

ACUMATICA VS MADE2MANAGE

This chart highlights key differences between Made2Manage ERP and Acumatica, focusing on features like mobility, cost, and scalability. See how Acumatica's cloud-based platform solves common Made2Manage challenges and supports long-term business growth.

MAIN FEATURE COMPARISON

Acumatica

Technology	Cloud-native, C#/.NET, modern web technologies, true cloud (public/private)	Proprietary Visual FoxPro (VFP), on-premise, outdated since Microsoft ended support in 2007
Core Functionality	Comprehensive: BOM, MRP, inventory, CRM, e-commerce, field service, financials	BOM, MRP, inventory, order entry; lacks CRM, e-commerce
Mobility	Full mobile access across all modules, optimized for any device	No native mobile support, on-premise access only
Cost/Licensing	Consumption-based pricing, unlimited users, lower TCO	Traditional per-user licensing, maintenance fees
Integration	Robust API, seamless integration with cloud apps (e.g., Power BI)	Limited, ODBC-based, complex for modern systems
Scalability	Highly scalable, supports SMBs to large enterprises	Limited, suited for small manufacturers, struggles with growth
Support/Future-Proofing	Regular updates, active support, future-proof cloud platform	Risk of obsolescence due to VFP, limited vendor support
User Experience/Reporting	Modern UI, no-code/low-code dashboards, advanced reporting (Power BI)	Dated interface, basic reporting requires developer work
